About

Each Alpaca adventure guitar is carefully hand made by our hands for yours. The body is composed of a carbon fiber shell and flax fabric reinforcement for tone. The soundboard is constructed of carbon fiber, flax fabric, sugar maple inlays and an integrated bridge and fingerboard. All our guitars are constructed with bio-derived epoxy and solvents. Alpaca guitar strives to source all it's materials domestically and endeavor to continually reduce it's carbon footprint. Waterproof, weather resistant and rugged.
